

AIDS Regional Information & Evaluation System

Jun-08

1

Introduction to ARIES

ARIES, the ***AIDS Regional Information and Evaluation System***, was developed by the State of Texas, the County of San Diego, the County of San Bernardino, and the State of California. The goal of ARIES is to enhance services for clients with HIV by helping providers automate, plan, manage, and report on client data.

Benefits

- All data entered at the source
- Data collection through a single system
- System Simplifies Annual CADR Report
- Bridge system for PBM (Pharmacy Benefits Manager - Catalyst RX)
- Clients can go to other area providers without re-enrolling in Ryan White Part-B

Jun-08

30

Other Enhancements

□ Digitech Scanning System

- Print a copy of the client application data to make changes and allow client to sign the copy of changed document.
- Scan all documents (application, labs, eligibility etc.) for client at the source.

□ Pharmacy Benefit Manager

- Catalyst RX PBM will control who gets drugs, what price Ryan White Part-B will be charged and how often the client can pick up their drugs. Exceptions will be handled by the state.
